July 11, 2018

Dear All:

You are receiving this communication to keep you apprised of the status of the ongoing hydrogeological investigation associated with the closed Waste Management Landfill property.

Following the conclusion of the Environmental Review Tribunal (ERT) proceedings, work has continued to address activities required by the ERT Orders, under technical oversight from Ministry of the Environment, Conservation and Parks (MECP). Specifically, additional field investigations have been conducted to further delineate a Contaminant Attenuation Zone (CAZ Investigation) for the site that, once approved, will allow the Environmental Monitoring Plan (EMP) to be finalized.

In the interim, the EMP was modified as ordered by the ERT to include new or modified conditions to the Environmental Compliance Approval (ECA) for the site, and implemented on an interim basis as of April 16, 2016.

Under the new ECA Conditions set forth in the revised EMP and ordered by the ERT, Waste Management has notified the MECP District Manager of results from the most recent sampling event at recently installed groundwater monitoring wells, conducted on June 28, 2018. We are providing, for your information, the notice supplied to MECP on July 11, 2018. All results outlined in this notice are related to concentration exceedances at locations within the proposed CAZ.

All results will be evaluated in the next complementary hydrogeological investigation report.

Regards,

Bill McDonough
Manager, Richmond Landfill
Waste Management of Canada Corporation

Encl.
MEMORANDUM

DATE: July 11, 2018
TO: Trevor Dagilis, District Manager, Ministry of the Environment, Conservation and Parks (MECP)
CC: David Arnott, Shawn Trimper and Peter Taylor (MECP)
FROM: François Richard and Phil Tibble (BluMetric)
PROJECT NO: 180149-02
SUBJECT: Notification of Off-site Exceedances, WM Richmond Landfill
Town of Greater Napanee

This memorandum is provided on behalf of Waste Management of Canada Corporation as required by Condition 8.7 of Environmental Compliance Approval (ECA) No. A371203 for the Richmond Landfill, Town of Greater Napanee, Ontario. This requirement is outlined in the Environmental Monitoring Plan (EMP) for the site, implemented on April 16, 2016 on an interim basis as ordered by the Environmental Review Tribunal (ERT) Order dated December 24, 2015. Condition 8.7 of the ECA stipulates that monitoring results shall be reported to the MECP District Manager within 48 hours of the determination of the exceedance (initial data screening) if they meet the following condition:

- any off-site exceedance of the applicable criteria for groundwater (Reasonable Use Limits (RUL)) or surface water (Provincial Water Quality Objectives (PWQO))

RESULTS

Groundwater samples were collected on June 28, 2018 from three (3) monitoring wells installed in the shallow groundwater flow zone and located in the central portion of the proposed CAZ (M178R-5, M205 and M206). This confirmatory sampling was conducted to verify results from the previous sampling event conducted on June 11, 2018, for which RUL exceedances were reported in a memorandum dated June 28, 2018.

1 Environmental Monitoring Plan, WM Richmond Landfill, Town of Greater Napanee, Ontario, rev. No.05, prepared by BluMetric Environmental Inc., dated April 2016
The analytical results for samples from off-site shallow groundwater flow zone monitoring locations showed the presence of parameters that exceeded their respective RUL at M178R-5, M205 and M206, as summarized in Table 1. These include:

- One or several non-health based parameters (alkalinity, dissolved organic carbon, iron, manganese and/or total dissolved solids); and,
- Volatile Organic Compound (VOC) 1,4 dioxane.

CLOSING

The complete results from this groundwater monitoring event and related hydrogeological investigation will be reported in the next site conceptual model update and CAZ delineation report.

We trust the above information is satisfactory. If you have any questions or need further information regarding the completed work please do not hesitate to contact the undersigned.

Respectfully submitted,

BluMetric Environmental Inc.
